

FOR IMMEDIATE RELEASE – January 2, 2008 – SEATTLE, WA

Jasmine Dewaller, of Family Review & Award Center announced today that the See Me Read Kit, By See Me Read, LLC, has been chosen as a winner of the prestigious Gold Award.

Dewaller shared that the See Me Read was found to be exceptional by the panel of judges at Family Review Center, as it helps new readers identify with the educational materials they are working with, by personalization in all aspects of the program. By integrating personalization and items used in everyday life, children will be able to start the reading process with ease.

Dewaller Cited “Parents have always been faced with the challenge of helping their children begin reading, using an approach that really works. Children love seeing themselves as the star of the show, and using this program, they will be featured again and again in a simple, easy setting for new readers. This is a priceless help to parents everywhere.”

“The See Me Read program is not a complex one. It does not take hours to begin learning with, and does not take a parent mentoring them every step of the way. Using this approach parents work with the children to get them going, and then the child will increase their skills on a daily basis in a non formal setting, as they go about life.” said Jasmine.

The Family Review & Award Center awards on the very best in products with one of our awards. When you see a product bearing our award symbol, you know it is a product you can trust.
